Central Technical Library at the University of Ljubljana

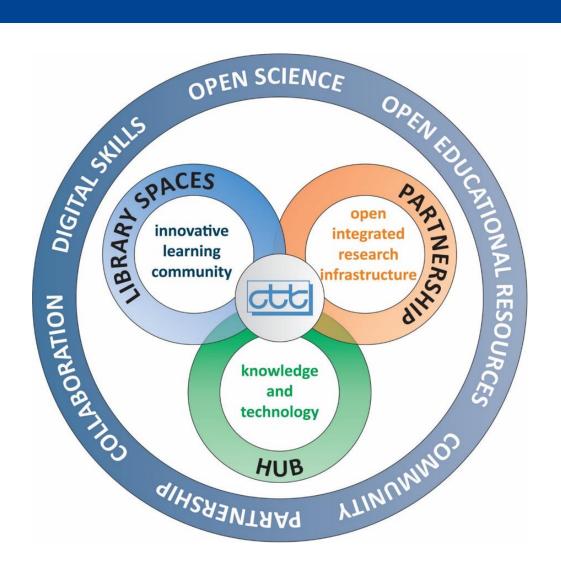

Miro Pušnik, miro.pusnik@ctk.uni-lj.si

Central Technical Library at the University of Ljubljana

Our Vision

An Innovative Learning Community

The library as a knowledge centre.

A community-driven library and student participation in formal governance.

Extended opening hours.

The library as a learning laboratory. Adequate library holdings.

Approx. 2500 m². CCa 200 reading seats. Approx. 150.000 items of printed material and 500.000 + items of e-resorces. Approx. 5000 active members. Approx. 200.000 visits. Opening hours 8.00 to 24.00, Saturdays 9.00 to 17.00, also open on Saturdays and Sundays until 24.00 during the academic year.

Open Integrated Research Infrastructure

Consortia of international scientific literature.

Active participation in the national system for the evaluation of scientific research work SICRIS.

Provision of infrastructure for open science:

Repository

Information support for open science

Citizen Science Network

Implementation of open science practices in research organisations aka the SPOZNAJ project

Transformative agreements. More than 2 million downloads of scientific articles. Around 1000 vouchers for open publications. Centre for Quality Assurance in Scholarly Communication. Citizen Science Network and Citizen Science Observatory.

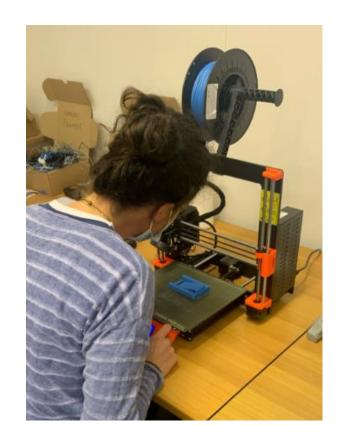

Knowledge and Technology Hub.

Makerspace as learning laboratory.

Library of things.

Standards with Standards Info Point.

Patents.

Connecting different user communities. Community driven. Promoting digital and analogue skills.

Basic Information

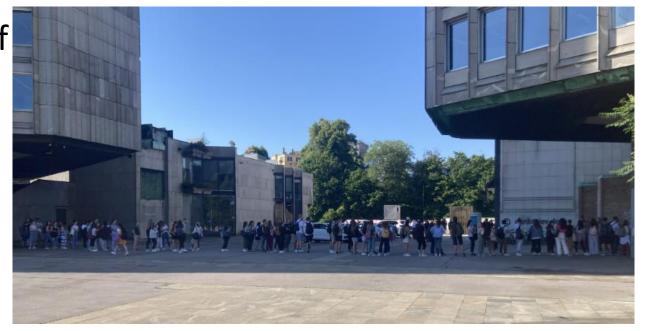

CTK was founded by the University of Ljubljana in 1949.

Funded directly from the public budget.

41 employees:

- different staff profiles and competences
- rejuvenating the team

Budget approx. 8 million.

This picture was taken on a Sunday morning 15 minutes before the library opened.

CTK as National Contact Point for Citizen Science

Open Publications

Na portalu odprteobjave.si so na voljo informacije o možnostih odprtih objav znanstvenih del v znanstvenih revijah glede na zahteve iz Uredbe o izvajanju znanstvenoraziskovalnega dela v skladu z načeli odprte znanosti ter glede na zahteve financerjev v Evropskem raziskovalnem prostoru. Seznanite se lahko s politikami financerjev, načini znanstvenih objav v odprtem dostopu in praksami, ki niso vredne zaupanja, nekaterih založnikov mednarodne znanstvene literature. Portal je trenutno v pilotni izvedbi in ga bomo sproti izpopolnjevali. Z veseljem bomo pri tem upoštevali tudi vaše pripombe.

Pripravili smo seznam znanstvenih revij, ki so dostopne v okviru tako imenovanih preoblikovalnih pogodb, kjer so konzorciji poleg branja vnaprej plačali tudi vavčerje za odprte objave. V seznamih so na voljo informacije o upravičenih uporabnikih in okvirno število vavčerjev za odprte objave. Portal vsebuje tudi iskalnik po seznamih odprtodostopnih revij v DOAJ, ki je najobsežnejša zbirka odprto dostopnih znanstvenih revij s preglednimi merili preverjanja verodostojnosti in kakovosti. S tem iskalnikom lahko poiščete primerno revijo za vašo objavo v tako imenovanih zlatih in diamantnih revijah.

Implementing Scientific Excellence to Local Communities

Open Science raises the scientific excellence and visibility of academic institutions.

Connecting universities and other research organizations with the local community is also a promoter of scientific excellence, and it means sharing and implementing of knowledge in the local community.
